**LED BELT TRACK
LIGHTING SYSTEM**

R26 LED Belt Track Lighting System

R26 LED Belt Track Lighting System that takes the concept of the light rail to a new level. No limited to set rails on horizontal plane, but design and create infinite possibility in stereoscopic space. The conductive textile ribbon at its core allows for free placement of the luminaires and the creation of unique light solutions on the spot.

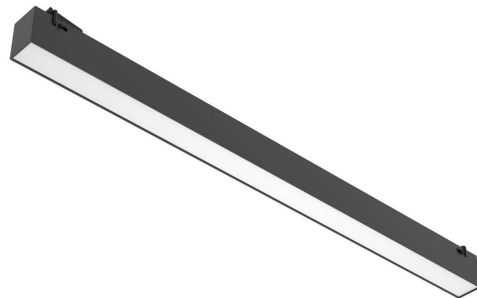

Easy Connection Fix / Click / Connect

Belt can be cutted as needed, accommodates multiple lights and operates with simple plug-in technology for unparalleled ease of installation and connection. The belt offers adjustments in tension from taut to relaxed as well as click-and-connect functionality, snapping into a buckle attached to each luminaire.

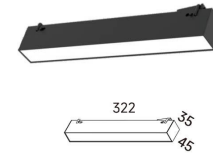

01

Linear Diffuser

It provides a high range of uniformity on the horizontal plane, and generates the first layer of illumination on which to add more specific lighting applications. It generates soft shadows and subdued brightness in the space, and its component elements do not display visual hierarchies.

02

Linear Light

As an ideal lighting for the workplace, appropriate brightness and clear form with direct lighting, extended beams and high lamp performance gives the light with high energy efficiency and low UGR level below 19.

03

Polarized Linear Light

Provides medium brightness and clear form. Polarized light, extended beams, and fixture performance give the unit high energy efficiency and low UGR level below 19. It is also ideal for combining the effect of wall washing with background.

04 Spot Light/Directed Diffusion Light

Use dense cones of light to emphasize objects or architectural elements. Brightness contrast attracts the eye, bringing illuminated objects into focus into the foreground. Directed diffusion light emits soft light, generates low contrasts between the illuminated areas and the shadows cast. Ideal for reading situations or when light output is visible, because it works without glare.

Semisphere 05

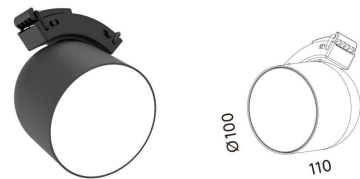

Emits a soft light that generates low contrasts between the illuminated areas and the shadows cast. The opaque part of the shade helps to direct the light through the diffuser, providing illumination that is both peaceful and concentrated at the same time.

06 Sphere

Distributes light equally in all directions (360°). It attracts a relaxed gaze towards the point of light, and creates a calm, very comfortable atmosphere. The light sphere bathes all surfaces of the space, Producing a peaceful, richer and extremely homogeneous ambience.
